

Paper Rocket Instructions

1. Cut out large rectangle and wrap tightly around pencil, tape it.
2. Cut out circle and then cut out the pie slice and discard it.
3. Connect "edges" of circle, overlap and keep twisting to get cone shape. Tape it tightly on top of rocket body (at pencil tip) so no air escapes. Pencil will help the rocket keep its form and not get squished.
4. Cut out triangles and tape these wings to bottom edges of rocket across from each other. Base of triangle should be at the bottom.
5. Remove pencil and insert straw. Blow into the straw and watch it blast off! Now try changing your design to make it go further.
