

NANOTECHNOLOGY

What's the big deal?

Advances in nanoscale science, engineering, and technology are revolutionizing many fields, including medicine, materials science, and manufacturing. Yet, these advances can be invisible or difficult to understand.

We invite you to probe the secrets of nanotechnology and find out for yourself, what's the big deal?

Many thanks to all those who worked to create this exhibition. Special thanks to the Oregon Museum of Science and Industry, Sciencenter and the Science Museum of Minnesota.

NISE and all related activities are supported by the National Science Foundation's Informal Science Education program (ESI - 0532536).
