DISRUPTOR SCENARIO EXAMPLES

The disruptor scenario examples provided here were created for the Durham, North Carolina community. You can adapt or replace these scenarios to fit your community and your program's focus.

Scenario 1

Your community has had a period of intense rain, and it seems to be a normal part of the late winter/early spring climate. Homes located near lakes and rivers are regularly evacuated and given Federal Emergency Management Agency (FEMA) funds to replace their homes. What can you do to help these residents?

Scenario 2

Your community has experienced drought conditions in the late summer/early fall season for the past four years. It is beginning to affect drinking water availability. What can be put in place to help with this crisis?

Scenario 3

Hurricanes have been hitting your state regularly for the past five years. While it does not always affect your community residents, there are regularly thousands of people relocating to your city for months on end. How can you help meet the needs of these refugees?

Scenario 4

With more severe storms happening in the area, there have been multiple times where power cannot be restored for 20–30 days. What can you put in place to help the public during these times?

Scenario 5

Your community has accepted a large amount of money to transfer a regional landfill to your area. The environmental effects have not been researched fully. What actions can you take to protect your community?
