

# NISE Net Online Workshop

Making Waves with Radio - New Ways to Engage Audiences with the Basics of Modern Communication & Navigation

Tuesday, April 4, 2023

## Today's Presenters:

**Darrell Porcello**, Ph.D., Children's Creativity Museum & Lawrence Hall of Science, University of California, Berkeley

**Sherry Hsi**, Ph.D., BSCS Science Learning

**Ali Jackson**, Sciencenter

**Steve Scholle**, Museum of Life and Science

**David Knudsen**, Museum of Life and Science

**Welcome!** As we wait to get started with today's discussion, please:

**Introduce yourself!** Type your name, institution, and location into the [Chat Box](#)

**Questions?** Feel free to type your questions into the [Chat Box](#) at any time throughout the webinar or use the raise your hand function in the participants list and we'll unmute your microphone.

Today's discussion will be recorded and shared on [nisenet.org](https://nisenet.org/events/online-workshop) at: [nisenet.org/events/online-workshop](https://nisenet.org/events/online-workshop)

# Today's Workshop Objectives

 Introduce **5 Big Ideas about Radio**

 Share **new hands-on activities** and apps for facilitating topics about radio communications, wireless technologies, and the future of radio.

 Listen to feedback from museum educators that have used these activities with their audiences.

**BSCS Science Learning**  
Colorado Springs, CO

**Children's Creativity Museum**  
San Francisco, CA

**Sciencenter**  
Ithaca, NY

**Museum of Life and Science**  
Durham, NC

**Emily Maletz Graphic Design**  
Portland, OR

**Swift Creek Media**  
Raleigh, NC

**Yellow Cow Consulting**  
San Francisco, CA

*Now let's try this : What is radio?*

# What is radio?

# What is radio?

- 1 Electromagnetic radiation is all around at all times.
- 2 Radio waves transfer energy that can be reflected, absorbed, or passed through materials.
- 3 Engineers create technologies to securely encode and decode information carried by radio waves.
- 4 Making radio technology equitable requires all of our voices.
- 5 Radio innovations may create surprising ways to communicate in the future.

## Content Training Video:

# New Making Waves Digital Kit

## Radio Explorers

Radio Silence

Messages from Space

Wi-Fi Detective

## Radio Futures

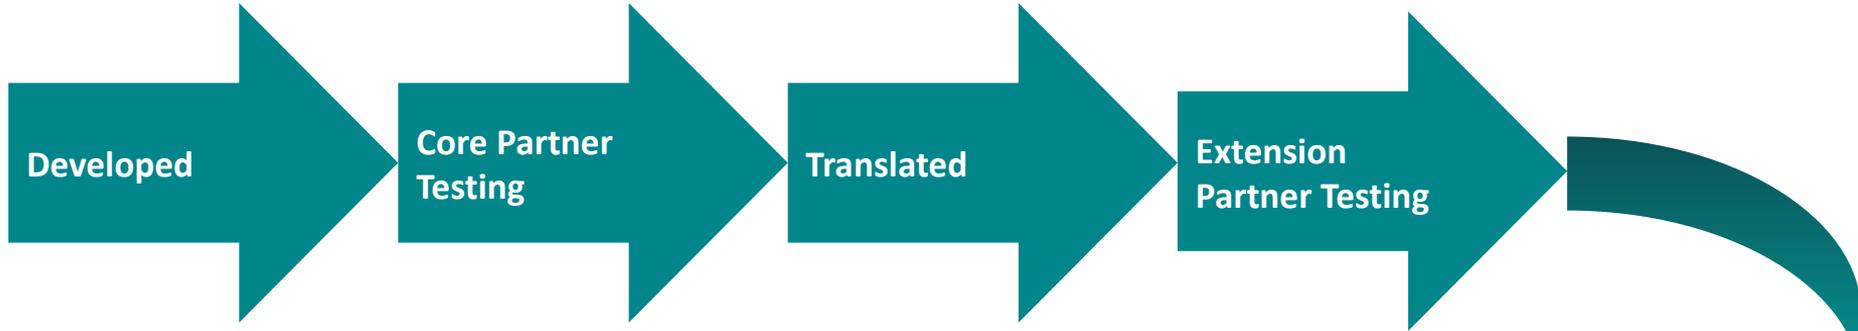

You Decide

I Spy Radio

- +Spanish versions
- +mobile apps
- +activity training videos
- +content training video

# Activity Development Process

**RADIO EMPLOYEES**  
**Radio Silence**

**1** First, lay out a selection of items. Turn on the radio and tune to a station. How does the radio signal sent from a station's transmitter make away get to your device?

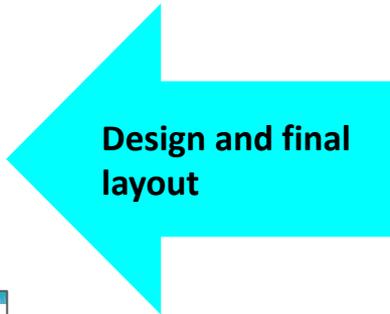

**2** Try making a shell of wrapping materials around your device or placing it in a container. Try to block the signal. Which materials work best at blocking the radio waves?

**3** After a station has been selected, take a piece of tape over the lens and volume knob. They do not change during the experiment.

**4** Now, try testing on radio devices like a walkie-talkie. Is it the signal in these materials work?

What changes when you raise or lower the antenna? Does your shell have to cover the whole radio or just part of it to affect the radio waves? Try testing the radio inside your container. What happens? Are you surprised?

PACKAGES (like one: **SHIELD**) of where they are and if they are back.

**Let's Send a Selfie in Wovetown**

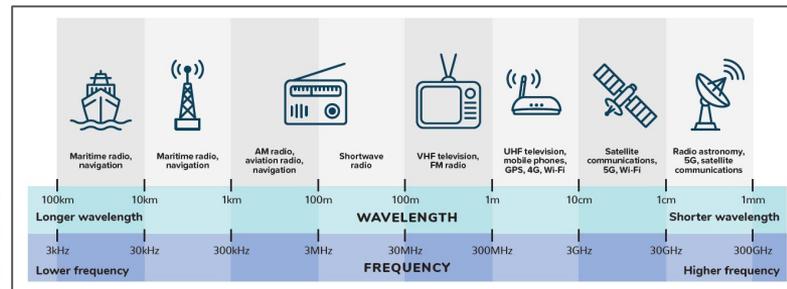

These selfie sticks can really let you do more than just take a picture. They can be used to control a camera's position and zoom in and out of the frame. Try using a selfie stick to take a picture of a friend's face. What happens? Are you surprised?

These selfie sticks can really let you do more than just take a picture. They can be used to control a camera's position and zoom in and out of the frame. Try using a selfie stick to take a picture of a friend's face. What happens? Are you surprised?

**REVISIONS**

# Radio Silence

# Messages from Space

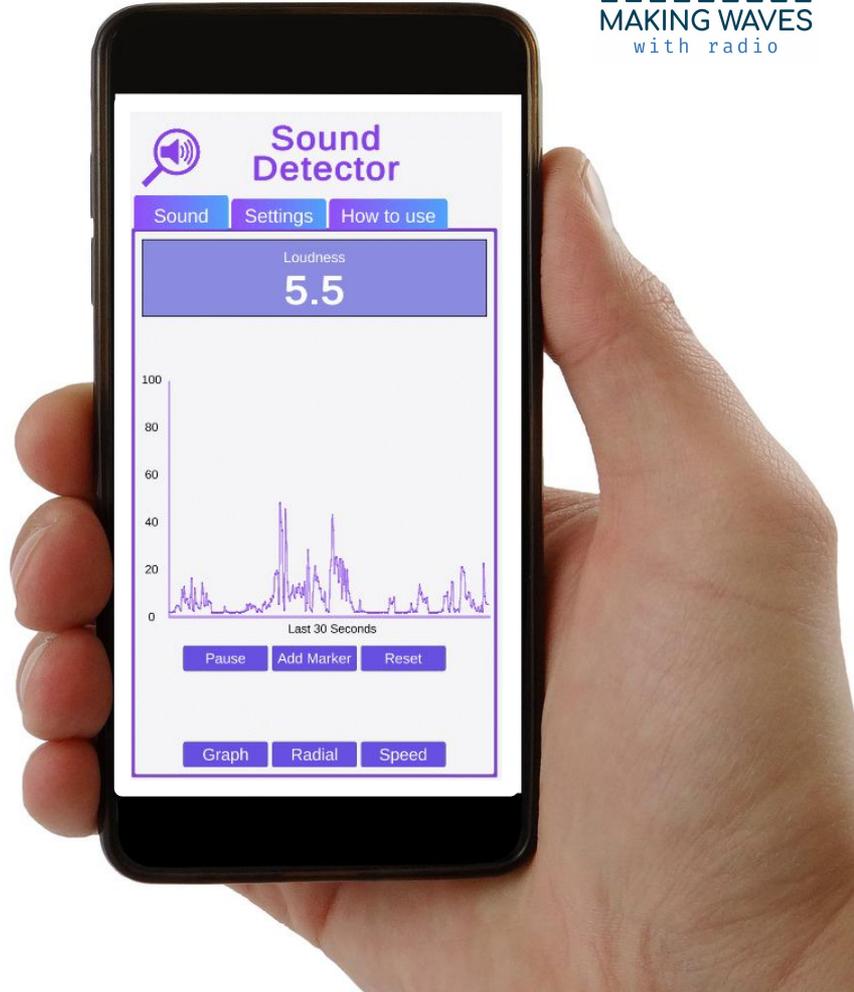

# Sound Detector app

- Minimal, sleek, kid-friendly
- Multiple Visualizations
- Historic Data Graph
- Spanish Translation
- Accessible Contrast Modes
- QR Code sign available

# You Decide

**Radio Wave Shield**  
Block the radio waves that carry data in and out of your home or business.

**TECHNOLOGY** SCIENCE FICTION >>>

**Drone Flock**  
These camera drones talk with each other to track whatever they are recording.

**TECHNOLOGY** COMING SOON >>>

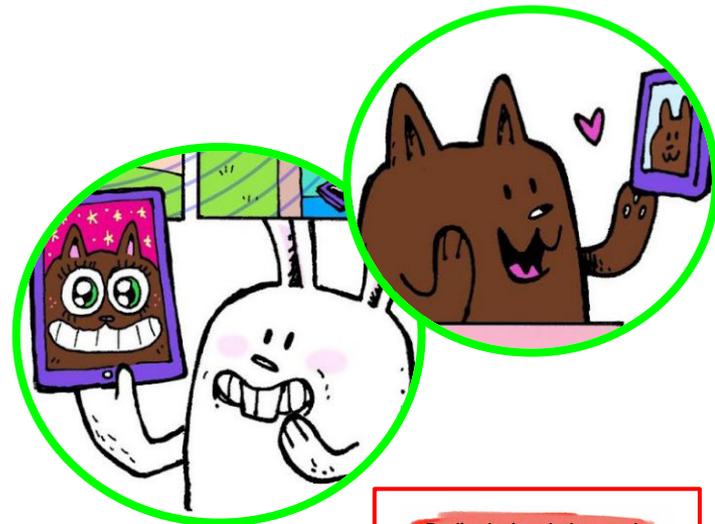

**Artist**  
NAME: Alex (she/her)  
AGE: 9  
HOUSEHOLD INCOME: \$555  
TECHNOLOGY: iPad, Chromebook  
Young artist just starting out

**PEOPLE**

**Medical Technology Engineer**  
NAME: Maira (he/her)  
AGE: 29  
HOUSEHOLD INCOME: \$55  
TECHNOLOGY: radio, laptop, desktop computer, cell phone  
Entrepreneurial, wants to start her own company

**PEOPLE**

# I Spy Radio

Radio devices help people talk together.

**CHILD:** Radio devices can help people talk with each other. Find some examples.

**ADULT:** Point out to your young partner one device you used recently.

**BOTH:** Decide your favorite way to talk to each other when separated. What device do you prefer and why?

# Feedback from Museum Educators

What did we hear from visitors while testing & developing the activities?

**Sciencenter - Ithaca, NY**  
Using **I Spy Radio** with younger learners.

**Museum of Life and Science - Durham, NC**  
Using **Radio Silence**, **You Decide**, and **Wi-Fi Detective**  
on the floor and with Spanish-speakers.

# Q&A

# Coming soon - Content Themes

## Physics of Radio

### What are radio waves

How waves work  
EM spectrum, wavelengths, & frequencies

Radio waves in space  
& through space

Blocking radio waves & interference

## Radio Communications Technology

How radio signals carry information - modulation, analog/digital conversion

### Transmitters & receivers

Data encryption & security, encoding & decoding

Signals: amplification, regeneration, jamming, & frequency hopping, 5G and beyond

Antennas & MIMO - resonance, bandwidth, modern antennas & antenna arrays

Sensor networks & IoT

## Radio in Society

Radio devices at home and around town (how communities and people use radio)

Spectrum allocation & crowding

Rights, Ownership, & Piracy (Industry cooperation services, pirate radio)

Myths, Health, & Well being (radiophobia)

Shaping radio futures and our roles

**Radio Makers**  
**Coding camp**

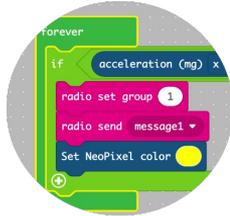

**Radio Explorers**  
**IoT radio camp**

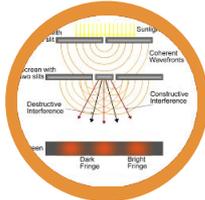

**Radio Makers**  
**Smart Cities**

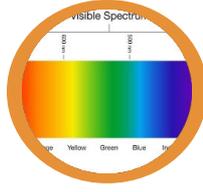

**Radio Makers**  
**My:Talkies**

**Radio Explorers**  
**Broadcasting**

**Radio Explorers**  
**EM waves**

**Radio Explorers**  
**Frequency Hopping**

**Radio Explorer**  
**Signal searcher**

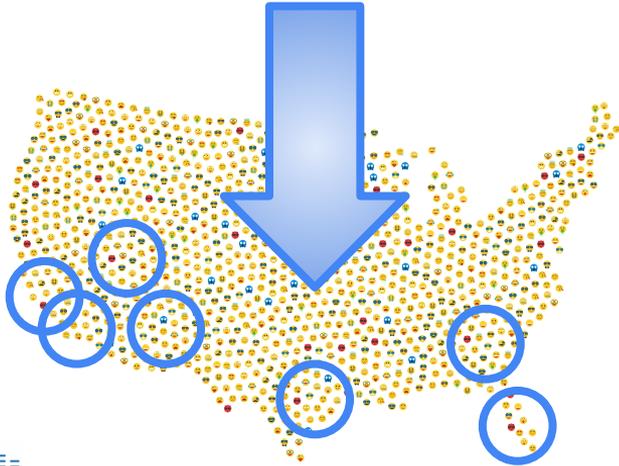

**Radio Makers**  
**Light Radio**

# Coming soon - Community of Practice

- Project team will assemble **10 physical kits** including museum activities and selection of camp curriculum
- All required materials will be included plus at least **one android phone**
- Museums will be invited to apply for materials and be paid to be part of a **small community of practice** to use and provide feedback on the materials
- Partner museums will attend a handful of zoom calls for **peer discussion and critique**

# 2023 Online Workshops

Bubbling Up later this Year... 🐱

Take a Voyage through the Solar System with the NISE Network!

Tuesday, May 9, 2023

2pm-3pm Eastern / 11am-12pm Pacific

Topics from Sustainable Futures Fellows  
- Coming this Summer!

Learn more at [nisenet.org/events](https://nisenet.org/events)

# Thank You
