The diagram illustrates the interconnectedness of various learning environments in a STEM learning ecosystem. The central node is a community center, which is connected to seven other nodes: a university, a museum, a science center, a workplace, a school, a library, and a home. The nodes are arranged in a circular pattern around the central node, connected by lines. The diagram is set against a background of a river, trees, and hills. The words "culture", "society", and "place" are written in large, bold letters across the diagram.
