

A hurricane has struck El Parasio!
Can you help?
Join the adventure
in our new interactive
story app.

Set in a near-future Puerto Rico, siblings Gabby and Raúl must restore their town's communication systems after a hurricane, diving into the world of radio science. Players will interact with townsfolk, learn through games, and explore technologies like radio-controlled holograms, AI tutors, and drones.

English + Español

Whispers in the Wind is a product of the Making Waves with Radio project funded by NSF (#2053160). Design and development was led by the Children's Creativity Museum and BSCS Science Learning.
