

These beads are not small enough to be at the nanoscale. If they were, you wouldn't be able to see the individual beads.

Each bead is 300 micrometers across (which is equal to 300,000 nanometers!).

1 thousand beads
(1,000)

1 million beads
(1,000,000)

1 billion beads
(1,000,000,000)
