

NanoProducts Resource List

NNIN **does not endorse** any of the manufacturers or suppliers of the products listed in the resource section. NNIN is only providing possible sources for obtaining materials used in the *Exploring Nanotechnology through Consumer Products* unit. Other sources for materials may be available and the teacher is encouraged to explore the Internet for additional suppliers or contact their local merchants to determine if the products are available locally. In place of using the actual products, pictures of the products may be substituted. These can be found on the manufacturer’s website.

Additional information on consumer products utilizing nanotechnology is available at <http://www.nanotechproject.org> (A Nanotechnology Consumer Products Inventory). At this site you will find a list of over 200 products with a description of the product and a link to the manufacturer’s web site.
