

# Reinvent @ Home!

## 1. Gather your materials.

You'll need: old crayons (wrapper removed), a cookie sheet, a cupcake pan or silicon mold, and an oven.

## 2. Break the crayons into small pieces

and put them inside the cups of your cupcake pan or mold. If you like, you can mix up the colors.

## 3. Set the oven to 250°F.

Put the cupcake pan or silicon mold on top of the cookie sheet, and have an adult place it in the oven.

4. When the wax has melted, take the cookie sheet out of the oven and place it on a level, heat-proof surface. Leave it for several hours, until the pans and contents have cooled completely. Then pop your new crayons out of the pan!
