EXPLORING SCIENCE PRACTICES

Measure Up
Play, learn, and discover together!
EXPLORING SCIENCE PRACTICES
Measure Up!

Try this with your toddler or preschooer!

Work with your child to investigate the tools and materials in the sandbox.

*Ask early learners: Do any of these tools remind you of something you’ve seen before? How can you use them?*

Encourage your child to measure by counting out loud with them.

*Ask early learners: How many handfuls of sand can you fit in the measuring cup? How many blocks fit along the length of your shoe?*

Continue to explore measurement with your early learner using the prompts on the take-home bookmark!
