Welcome! Today’s presenters are:
• Nich Weller, Arizona State University
• Cathy Dyer, Leslie Science & Nature Center
• Dave Laubenthal, Oregon Museum of Science and Industry
• Paul Martin, Arizona State University

As we wait to get started with today’s discussion, please:
• Update your display name: Include your first and last names and your institution
• Introduce yourself! Type your name and institution into the Chat Box
• Questions? Feel free to type your questions into the Chat Box at any time throughout the online workshop or use the raise your hand function in the participants list and we’ll unmute your microphone

All online workshops are recorded and archived online:
http://www.nisenet.org/event-type/online-workshop
Working Together to Create a Sustainable Future
Agenda

1. Program overview
2. Sustainability and museums: Partnerships and operations
3. Programs and partnerships for sustainability at the Leslie Science & Nature Center and OMSI
4. NISE Network sustainability programs and activities
NISE Network Sustainability Initiative

**Purpose:** Support museums and similar cultural organizations in their efforts to integrate sustainability into their program and operations.

**Approach:** Provide professional development and resources that share and develop sustainability science and practice.

**Strategic outcome:** Leverage the power of museums around the world to help millions of people understand the social, environmental and economic impact of human behavior on the planet’s future.
NISE Network Sustainability Initiative

**Professional development:** Fellowship program, online workshops, and online resources

**Public programs:** New programs in a variety of formats to complement the existing sustainABLE kit of hands-on activities

[http://www.nisenet.org/sustainability](http://www.nisenet.org/sustainability)
Workshop Series

Aim: Support Network partners in engaging staff, visitors, and communities in creating a sustainable future.

Today’s workshop:
• Partnerships and practices for sustainability

Upcoming workshops:
• Sustainability and Museum Visitors:
  – Tuesday, March 3, 2020; 2-3pm Eastern/11am-12pm Pacific.
What is Sustainability?
Sustainability

“meets the needs of the present without compromising the ability of future generations to meet their own needs”

Sustainability

“meets the needs of the present without compromising the ability of future generations to meet their own needs”

Needs – include food, water, shelter, work, happiness, and respect.

Present – people all over the world have needs that are equally important and must be met.

Future – people in the future will also have needs. How will our actions affect them?

United Nations Sustainable Development Goals

1. No Poverty
2. Zero Hunger
3. Good Health and Well-being
4. Quality Education
5. Gender Equality
6. Clean Water and Sanitation
7. Affordable and Clean Energy
8. Decent Work and Economic Growth
9. Industry, Innovation and Infrastructure
10. Reduced Inequalities
11. Sustainable Cities and Communities
12. Responsible Consumption and Production
13. Climate Action
14. Life Below Water
15. Life on Land
16. Peace, Justice and Strong Institutions
17. Partnerships for the Goals
“cultivates individual and collective potential ... to increase the possibility that humans and other life can flourish on Earth now and into the future ”

“cultivates individual and collective potential ... to increase the possibility that humans and other life can flourish on Earth now and into the future”

Sustainability means healthy people, communities, and environments, now and in the future.
Whole Institution Approach

Governance, policy, and capacity building

Education for sustainability

Community partnerships and relationships

Education and learning

Facilities and operations
Sustainable Practices

- Purchasing, retail policies
- Redesign activities for re-use
- Create a sustainability team
- Long-term sustainability planning
- Composting and recycling
- Waste, energy, or water audits
- Sustainability improvements during renovations
- Sustainability training for staff
Sustainable Practices

- Purchasing, retail policies
- Redesign activities for re-use
- Create a sustainability team
- Long-term sustainability planning
- Composting and recycling
- Waste, energy, or water audits
- Sustainability improvements during renovations
- Sustainability training for staff
Sustainable Practices

- Purchasing, retail policies
- Redesign activities for re-use
- Create a sustainability team
- Long-term sustainability planning
- Composting and recycling
- Waste, energy, or water audits
- Sustainability improvements during renovations
- Sustainability training for staff

Partnerships can help develop these practices
Partnerships for Sustainability

• Build local sustainability coalitions
• Share resources, expertise for sustainability-related programs
• Contribute to broader community-wide efforts
POLL

What does your organization do behind the scenes to be more sustainable?

- Exhibit re-use
- Composting
- Recycling
- Renewable energy
- Water conservation
- Partner with other orgs
- Other
- We’re still planning!
Cathy Dyer
Leslie Science & Nature Center
Ann Arbor, Michigan
Project Goals

Members of the community appreciate and care for the unique wetlands and forests within our watershed.

Develop partnerships with local organizations:

Natural Area Preservation (NAP), Huron River Watershed Council (HRWC), Rain Gardens Washtenaw County, Legacy Land Conservancy, Rudolph Steiner High School
Project Activities

- Meet a Salamander
- Hike to forest, pond, wet prairie view,
- Your water address and using hands on map of St Lawrence system Follow a drop of water from A2 to the ocean.
- Wetland in a pan- small groups
- Share Stories about exploring wetlands
- Opportunities to Help (NAP, HRWC, Rain Gardens Washtenaw, Legacy Land Conservancy)
OBJECTIVES
Participants will...
• figure out and write down their water address.
• demonstrate the importance of wetlands in the Traver Creek and St. Lawrence Watersheds.
• understand the role of forests and wetlands in watershed locally and regionally via a hands on map. Experience a first-hand connection with local wetlands and with ways to take care of these areas.
• be able to explain why Southeast Michigan has a unique ecological role.
Other Sustainability Practices

• Committee to research recruitment and retention strategies for increasing diversity of staff
• Composting and recycling
• Participating organization in A2 Climate Zero

• Partnership with a local artists’ exhibit on climate change at our hands on museum
• Quality education-land and water, STEM, zero waste events
Dave Laubenthal  Creative Director
OMSI  Portland, OR
The Oregon Museum of Science and Industry (OMSI) in Portland, a national leader in science exhibit design and production, has created a tool that can help museums evaluate the sustainability of exhibits.

Inspired by the Leadership in Energy and Environmental Design (LEED) rating system, which is the “gold standard” used in building design and construction, OMSI’s Green Exhibit Checklist rates an exhibit in terms of its environmental impact.

The Green Exhibit Checklist awards 0–4 points when evaluating each of eight elements common in exhibit design:

1. **Rapidly Renewable Materials.** Does the exhibit use resources that renew themselves quickly in nature, such as bamboo, cork, sunflower seed composite, and wheatboard?
2. **Resource Reuse.** Is the exhibit designed with materials that can be reused in other exhibits when this one is retired? And/or does this exhibit reuse materials from other sources?
3. **Recycled Content.** Does the exhibit use recycled materials rather than plastic laminates and acrylics, which are not yet made of recycled materials?
4. **End-life Assessment.** What portion of the exhibit can be reused or recycled at the end of the exhibit’s life? For example, does the exhibit use a modular construction that can be updated or modified with new content?
5. **Low-Emitting Materials.** Does the exhibit use low- or zero-Volatile Organic Compound (VOC) paints, adhesives, and sealants?
6. **Certified Wood.** Does the exhibit use wood harvested from forests that have been managed in environmentally responsible ways?
7. **Conservation.** Is the exhibit designed for energy efficiency, including types of lighting, motion sensors which turn off electrical elements when not in use, etc.?
8. **Regional Materials.** Does it use regional materials that support the economy and reduce environmental impacts from transportation of materials?

An exhibit’s total number of points determines its level of rating. For example, an exhibit that scores 6–10 points receives a “green” rating while one that scores 19–26 points receives a “gold” rating.

OMSI’s goal is to have all OMSI-built exhibits qualify for green rating or higher by 2012. Our hope is that the OMSI Green Exhibit Checklist programs may help other museums worldwide plan exhibits with environmental considerations in mind and that it can also be a resource in the renting and buying of exhibits.
### OMSI GREEN EXHIBIT RATING

<table>
<thead>
<tr>

<tr>
<td>27 - 32</td>
<td>Platinum Rating</td>
</tr>
</tbody>
</table>

### NEW PROJECT - EXAMPLE

Example of Green Exhibit Checklist process for new projects

**Step 1.** As the timeline, budget, and deliverables are being established, the design and production teams decide on the rating goal.

**Step 2.** The designer specifies materials, mindful of the goal.

**Step 3.** The production lead oversees implementation of specifications.

**Step 4.** Once the exhibit opens, a rating assessment is done using the checklist. The design manager, lead designer, production manager, and production lead each assess the exhibit.

**Step 5.** Scores are reviewed and a final assessment is given.

**Step 6.** Rating is awarded.
Green Exhibit Checklist

The Green Exhibit Checklist (GEC) is a tool to evaluate the environmental sustainability of exhibits. The goal of the checklist is to inspire exhibit teams to reduce the environmental impacts of exhibit production.

The Green Exhibit Checklist can be a useful tool in early planning to help set project goals. Then, once the exhibit is on the floor, the checklist is used to assess the final outcome.

The GEC awards points in 5 KEY STRATEGIES:

- Reduce new material consumption
- Use local resources
- Reduce waste
- Reduce energy consumption
- Reduce products with toxic emissions

A sixth category awards points for innovation in the design and construction of the exhibit. This encourages exhibit teams to strive for new and creative solutions to reduce environmental impacts.

Step 1: Team sets the goal for the exhibit: Platinum, Gold, Silver, or Bronze.

Step 2: Designer and fabricator review checklist to find the best strategies for meeting the goal.

Step 3: After production, the fabricator fills out the GEC with the relevant material information.

Step 4: Exhibit team conducts walk-through, using the material information to award points.
# Reduce new material consumption.

**INTENT:** Reduce demand for virgin materials thereby reducing industrial practices that pollute the environment and exploit natural resources.

**STRATEGIES:**
- Use recycled materials (regrind HDPE, aluminum, etc.).
- Reuse building materials (from previous exhibits or deconstruction of houses, etc.).
- Use wood from responsibly managed forests.
- Use rapidly renewable materials (bamboo, wheat board, etc.).
- Construct exhibits using fewer materials.

<table>
<thead>
<tr>
<th>List all materials that were recycled, reused, FSC-certified wood, or rapidly renewable:</th>
<th>Estimated % of total exhibit (by volume):</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>List any virgin materials (no recycled content, newly purchased, not renewable):</th>
<th>Estimated % of total exhibit (by volume):</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**SCORING:**
- 4 points if AT LEAST 90% of the materials are recycled, reused, or renewable.
- 3 points for AT LEAST 75%
- 2 points for AT LEAST 50%
- 1 point for AT LEAST 10%
- 0 points if LESS THAN 10%

Exhibits (EOL)
Project: Strategic Planning and Visioning

5 Year Strategy
OMSI’s 5 Year Strategy defines the investment choices we will make and the associated outcomes we expect in the first 5 years of our 20 Year Vision. Annual roadmaps will detail specific milestones along our journey.

20 Year Vision
OMSI, collaborating with partners, will ignite an education transformation at the intersection of science, technology and design, and weave a thriving innovation district into the fabric of Portland that spreads opportunities across the/for youth.

Mission
Inspire curiosity through engaging science learning experiences, foster experimentation and the exchange of ideas, and stimulate innovation.

Building on our Core
Over the next 5 years, OMSI will provide world-class science learning experiences to children and families across Oregon. We will continue to develop and present an exciting mix of exhibits, programs and events to delight and inspire our audiences. We will do this all with an emphasis on operational excellence, a commitment to living our values, and in a style that is compelling to partners, staff and the community as a whole.

Strategic Priorities
OMSI District
Laying the foundation for the OMSI Campus

Statewide Outreach
Expanding our statewide impact

Museum Experience Reimagined
Elevating the guest and staff experience at Water Avenue

Outcomes
Statewide participation in OMSI experiences increases 20% over the next 5 years

OMSI’s participants are more aware of opportunities to further their science learning through OMSI and its communities

OMSI participants feel OMSI experiences are valuable, high-quality, and meet or exceed their expectations

OMSI recruits, develops, and retains staff of diverse background and character to a

At least 40% of OMSI participants are members underrepresented in STEM

Employees and volunteers report a high level of satisfaction working at OMSI

Increased Contributed Income
Supporting our aspirations

Launch Comprehensive Campaign
Build Partnership Program

Invest in Building
Develop the Staff Experience

Space Science and Planetarium
Center for Innovation (Turbine Hall)

OMSI District
Prepare for 3rd Party Development
Gather OMSI Campus Needs

OMSI’s funding supports strategic investments and builds financial strength

Invest in Hancock Field Station and Coastal Discovery Center

Deepen Community Engagement

Develop Outdoor Placemaking Activities
Project: Strategic Planning and Visioning

Vision
OMSI, collaborating with partners, will ignite an education transformation at the intersection of science, technology, and design, and weave a thriving innovation district into the fabric of Portland, that spreads opportunities across the Northwest.

OMSI District
The OMSI District will be a playful, immersive place for the exchange of ideas and creative expression—among scientists, artists, engineers, teachers, inventors, and people from diverse backgrounds and cultures—that stimulate innovative problem-solving.

OMSI of the Future
OMSI experiences provide trailheads to deeper learning. OMSI sparks curiosity through immersive experiences that cannot be replicated in schools or online. With the learner at the center, OMSI orients people of all ages to paths to deeper engagement and connection through diverse programming and partnerships across the region.

Mission
Inspire curiosity through engaging science learning experiences, foster experimentation and the exchange of ideas, and stimulate informed action.

Partners
We will build an ecosystem of communities and partners, creating mutually-beneficial relationships. OMSI co-develops and curates content with partners, package it into immersive experiences, and engages broad audiences.

Equitable Impact
We will work to dismantle barriers to equity and access to the experiences OMSI provides and to create welcoming environments and conditions where all people can reach their full potential. We lead with race.

Revolutionizing Science Learning
OMSI will be a change agent in STEAM education as traditional education systems are disrupted.
- Increase student engagement and transform the learning environment
- Increase student engagement and transform the learning environment
- Increase student engagement and transform the learning environment

New Revenue Model
Current State
Future State
New revenue streams support expanding capacity, including multiple streams of earned income. Operational excellence keeps us continuously improving how we create value for our audiences.

Advocating Informed Action
We will actively advocate for science understanding, scientific method, evidence-based decision making, and STEAM educational policy. OMSI will use its convening power to elevate voices, stimulate critical thinking about important local and global challenges, and position STEAM as a means for creating community benefit and achieving social justice goals.
Project: Strategic Planning and Visioning

OMSI VALUES & Signal Behaviors
Values are powerful drivers of how we think, make decisions, and behave. They define the culture of our organization. The following are OMSI’s Values and the signal behaviors that indicate that we live those values every day.

Core Values
- **Learning** teaching; asking questions; sharing; experimenting
- **Creativity** making (new) mistakes; sharing ideas; innovating; pushing the envelope
- **Integrity** publishing visitor comments; accepting and acting on feedback; taking pride in our work; presenting accurate science; supporting honest communication; taking responsibility for our actions
- **Sustainability** promoting fiscal responsibility; making triple bottom line decisions ($/environment/people); identifying and meeting community needs; measuring and reporting impacts and results for all activities

Strategic Values
- **Our People** providing a flexible and fun workplace; listening and communicating openly; compensating fairly; allowing people to grow in and outside of their jobs; providing the tools to do the job; setting measurable goals and holding ourselves accountable to results
- **Collaboration** creating high performing work teams; supporting onstage staff during busy times; exchanging value with partners; caring about each other
- **Accessibility and Equity** listening to audiences we are trying to reach; offering a welcoming guest experience; proactively increasing diversity of staff/diversity of guests; serving underserved audiences through sustainable programs; proactively working to eliminate barriers

OMSI Equity Statement
OMSI respects, values and celebrates the unique attributes, characteristics and perspectives that make each person who they are. We believe that we will be successful in accomplishing our mission and vision when we seek out and respond to diversity of participation, thought and action. We will work to dismantle barriers to equity and access to the experiences OMSI provides and to create welcoming environments and conditions where all people can reach their full potential.
Thank You!

2. Current programs and efforts
3. Limitations and challenges
4. Broadening impact

Sustainability & Museums
Conversation Guide

Sustainability means healthy people, communities, and environments, now and in the future. Cultural organizations like museums and gardens can promote learning about sustainability through programs and exhibits, can build community partnerships for sustainability goals, and can lead by example by adopting sustainable practices.

USING THIS GUIDE
Sustainability efforts often span people and departments. Use this guide in meetings, workshops, or one-on-one conversations with others at your organization to identify existing sustainability efforts, create a sustainability vision and goal, and identify pathways to reach those goals. Encourage yourself and others to be both open-minded and critical in answering the questions below. Be sure to consider your organization’s public-facing efforts as well as internal efforts like changes to policies or operations.

1. Sustainability vision and goals
   a. What is our organization’s goal and vision for sustainability?
